Subject: CES Analytical Update

Gary,

Please see the attachments. The spreadsheet is updated with all of this information.

SDG 53875 (VB640, VB25141) – Level 2 report

SDG 53874 (VB281842, VB641, VB633) – complete prelim report, this version includes 2 sulfide results. We are waiting on the lab to correct. Once this is corrected, a level 2 report will be issued.

SDG 53876 (VB610 totals; TCLP is in 53868 that was provided yesterday) – complete prelim report, this version includes 2 sulfide results. This is being corrected. Additionally, the pesticide analyte DDT is reported as ND. This result is being verified with re-analysis. There were QC failures.

SDG 53867 (VB607 totals; TCLP is in 53868 that was provided yesterday) – partial prelim report, BTU has not been reported yet. Additionally, pesticide analyte Endosulfan I exceeded the calibration range of the instrument. The E flagged result is reported. This result will change after the dilution analysis is completed.

Please let me know if you have any questions.

Kristie
